Product Name:

T-120 hydroseeder, series ii

Special Features:

1000 gallon working capacity to seed, fertilize and mulch 1/3 acre per load in one-step process. Flexibility to use tower gun and hose with remote valve simultaneously. Heavy duty agitator driven by variable speed, reversible, hydraulic motor. Agitator and pump are independently driven for complete mixing with pump operation. Increased gallons per minute (gpm) pump output, improved piping and pressure capabilities allow spray distances of up to 180 feed from tower gun. Independent suspension axles equipped with electric brakes and heavy duty wheels with standard radial tires. Gooseneck design. Repositioned boom increases dispersion angle for side and rear facing applications.

Shelf Life:
