Mounting Type:

Floor

Drive Type:

Single head

Maximum Generator Diameter Accommodated:

18.000 inches

Driving Motor Transmission:

Not included

Electric Motor Blower:

Not included

Special Features:

8000 psi test capacity; air operated test pump; soft seated inlet/outlet check valves; 8 and one-half in. Dia. Calibrated test gage; 8000 psi calibrated test cylinder; 18 in. Dia. By 72in. Tall water jacket; 6 individually valved manifolded burettes, sizes: 0-12.5 cc, 0-25 cc, 0-50 cc, 0-125 cc, 0-250 cc, 0-360 cc; 18 in. Time vs pressure chart recorder; cylinder to be tested is enclosed in water filled jacket, pressurized internally to specified test pressure volumetric expansion measured via water displaced into calibrated burette: pct permanent and elastic expansions calculated from measured total and permanent volumetric expansion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T361-f
