Product Name:

Gun, 7.62mm weapons

Special Features:

Mk 44 mod 3 gun weapon system is a complete weapon system. It contains weapon, trigger/gun control unit (gcu), ammunition storage unit, and all attaching hardware & cabling. It may be powered from any 24-volt, direct current (vdc) source capable of supplying 2,500 watts of power. It has an interchangeable pintle which enables it to be mounted on a variety of platforms. Ammunition is supplied through a flexible feed chute enabling weapon system to be fed from a remote ammunition storage system. Rate of fire is set to 3,000 rounds per minute. All firing operations are controlled by trigger/gcu, which is mounted within spade grip assembly. Trigger/gcu provides either right or left hand operation.
