Overall Height:

0.104 inches

Overall Width:

0.392 inches

End Application:

Aircraft, f/a-18

Criticality Code Justification:

Feat

Special Features:

2part has two pin holes, one on each end, 0.189 inches in diameter, plus/minus .001; distance between pin hole centers is 5.287, plus/minus .002 inches; rounded ends each have radius of 0.196 inches, plus/minus .002 inches; flight safety critical

Material:

Steel

General Description:

Ssteel alloy, ams 6532 (aermet 100); part may also be used on f14 aircraft; magnetic partical inspection per mil-s-1949 to soundness requirements per mil-s-1907, grade a; apply lubricant, item 1, per mil-l-46010, .0002-.0005 thick

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
