**Width:**

4.725 inches

**Thickness:**

0.250 inches

**Length:**

4.825 inches

**Polished Periphery:**

Not provided

**Special Features:**

Material used in the manufacture of this optical part shall not contain thorium, other radioactive material, or any combination of nuclear materials in excess of 0.05 percent by weight as defined by the title 10, code of federal regulations, part 40. No chips inside free aperture. All chips outside free aperture to be stoned

**Material:**

Glass, optical, mil-g-174, class 1, grade a, type 517-642

**Material:**

Glass, optical, mil-g-174, class 1, grade a, type 517-642

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T271-f
