Field View Coverage:

7 degrees

Objective Aperture Diameter:

32.0 millimeters

Special Features:

The sight, bore, optical a4 is a 4 power, straight optical aiming device configured to mount on the m16a4 service rifle with the mil-std-1913 rail adapter assembly. It attaches to the rail to provide the user a targeting tool to engage distant daylight also near low-lit targets with increased certainty. The reticle is ballistically matched to the m16a4's 5.56 round. A light pipe provides input to the reticle during the day and a tritium device is used for low light situations to illuminate the reticle. Height=2.38 inches, width=2.08 inches, weight=15.1 oz. Length=5.8 inches, eye relief=1.5 in, eyeupil=8mm, waterproof to 66 ft. The optical aiming device is configured to mount on the m16a4 service rifle with the mil-std-1913 rail adapter assembly.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
