Scale Calibration:

3 clicks per inch at 100-yards

Field View Coverage:

7.0

Objective Aperture Diameter:

32.0 millimeters

Magnification:

4x

Special Features:

Eye relief 1.5-inch; exit pupil 8-mm; reticle chevron designed to be zeroed using the tip at 100 meters. Chevron width at the base is 5.53 minutes of angle (moa) which is 19" at 300 meters allowing range estimation for silhouette targets. Field of view (fov) 36.8 feet at 100 yards

Supplementary Features:

Height 2.38 inches, width 2.08 inches, weight 15.1 oz, length 5.8 inches, eye pupil 8mm, waterproof to 66 ft. The optical aiming device is configured to mount on the m16m4 service rifle with the mil-std-1913 rail adapter assembly.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T271-a
