Special Features:

The su-231c/peq is an upgrade to the su-231/peq. It is a holographic weapon sight that allows the user to acquire a target and aim the weapon. It uses a single transversely mounted lithium 123 battery. The reticle is a 65 moa circle with quadrant ticks and a 1 moa aiming dot. The windage and elevation adjustment knobs are modified to allow for tool-free zeroing adjustment. Housing color is black. Designed for use with the m4 carbine and scar weapon systems

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
