End Application:

Projection unit head up display

General Description:

Assembly consists of a four-stage multiplier with an output voltage of 12.50 kv utilizing a 10.00 khz square wave input of 3135.00 v peak, individual capacitors have an insulation resistance of 100.00 k megohms, length 3.00 in., regulation of voltage 80.00 to 830.00 microamps

Fsc Application Data:

Aircraft gunnery fire control parts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
