Radar Receiver-generator - Page 1 of 1

View Online at <https://aerobasegroup.com/nsn/1270-01-410-9915>

Overall Length:

21.800 inches

Overall Height:

11.300 inches

Overall Width:

8.500 inches

End Application:

F-16a/b, an/apg-66v2

Received Signal Frequency Rating:

Between 8.0 gigahertz and 12.0 gigahertz

Criticality Code Justification:

Feat

Special Features:

Electrostatic discharge sensitive; common name: low power radio frequency (lprf)

Relationship To Similar Equipment:

Similar to p/n 781r130g02, -g03, and -g04; different frequencies

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T208-a
