Average Life Measurement:

Not rated

End Application:

An/apg-68 radar, f-16c/d block 30

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Rack

Circuit Construction Type:

Solid state

Special Features:

Consists of: chassis assembly 1; power supply assembly 1; board assembly 3; cover 1; digital modules 28; eca 1; common name: programmable signal processor

Relationship To Similar Equipment:

Similar to 1270-01-396-6750 w/new memory eca

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
