Overall Length:

6.000 inches

Overall Height:

0.562 inches

Overall Width:

5.200 inches

End Application:

Radar set subassembly

Component Type And Quantity:

1 printed wiring board

Special Features:

Transistor, resistor, diode, capacitor; mounting method: holes for screws; component qty: 25; mounting configuration: three 0.156 in.Dia mtg holes spaced on 4.800 in.By 5.000 in.Mtg centers; fsc application data: radar set, fire control, nonairborne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A5110
