Overall Length:

20.380 inches

Overall Height:

4.875 inches

Overall Width:

2.312 inches

Special Features:

Major components and quantity: cable assembly; capacitor; chassis assembly; coil; component board assembly; connector contact strip; cover; diode; filter; resistor; transistor; 387; mounting method and configuration: bracket, screw; two 10-32 threaded screws in bracket, one bracket mounted on top and one on bottom of chassis, brackets are spaced 19.750 inch center to center and holes are spaced 1.780 inch center to center within brackets

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A51110
