**General Description:**

5000 ohms input impedance, max output level 4 vrms unloaded, frequency response 300 hz to 3 mhz, operating temperature range 0 degrees c to p50 degrees c, 4.844 in. Lg, 1.000 in. W, 14.770 in. Deep

**Fsc Application Data:**

Radio frequency radar, airborne except fire control and guided missile

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
