General Description:

Item is part of waveguide switch that multiplexes two receive signals into single receive channel while maintaining high isolation of the decoupled input and insertion phase tracking of the two rf paths; separable and field replaceable; furnishes minus 1.5 to positive 1.5 vdc for binary one, minus 13.5 to minus 17.5 vdc for binary zero, and switches in not more than 6.0 microseconds; o/a dims 9.0 in. Lg, 4.5 in. W, 1.85 in. H
