Product Name:

40 mm smokeless powder round (marking)

Special Features:

The 40mm direct impact? Mmunition travels at an average velocity of 295 feet per second (89.9 mps) with an effective range of 5 ft - 120 ft (1.52m - 36.6m); this lightweight, high-speed projectile consists of a plastic body and a crushable foam nose; the green foam nose indicates that the round contains a marking agent; this munition is a point-of-aim, point-of-impact direct fire round which has passed extensive human effects assessments for blunt impact and penetration; the 40 mm direct impact? Round is most commonly used by tactical teams in situations where greater accuracy and deliverable energy is desired for the incapacitation of an aggressive, non-compliant subject at longer distances
