Overall Length:

4.705 inches

Model Number:

M258e6

Dot Registration Code:

Ex1991020185

Net Explosive Weight:

0.855 storage pounds and 0.855 transportation pounds

Special Features:

Explosive filler material is composition hta-3 which consists of tnt, hmx, and aluminum; the outer case material is titanium alloy; included in warhead section are pbx pellet and fuze m934e2; weight shall be 2.25 lbs; item used on the stinger

Gross Weight:

436.0 pallet pounds

Hazardous Material Classification Code:

1.1 department of defense hazard class division and d storage compatibility group

Quantity Per Shipping Container:

120

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T357-c
