Special Features:

The mju-55/b decoy flare-device is a two part ir countermeasure that uses both a mtv flare grain and pyrophoric special materials. There is no company that can manufacture both of these components. The preferred method of procuring mju-55/b decoy flare-devices is to buy special material from alloy surfaces co. And then provide the special material as gov. Furnished material to an mtv decoy flare producer to be assembled into a full-up mju-55/b decoy flare-device.
