Model Number:

Primasheet 1000

Charge Design Type:

Flexible linear

Filler Material:

Petn

Special Features:

2weight designation cm/in c 1.0; thickness 0.042 in, 1mm; primasheet 1000 is a water and moisture proof petn based flexible sheet explosive; used in hardening metals-manganese steels can be hardened by detonating the flexible sheet in contact with the metal surface; used extensively in the railroad industry for metal track switches; used for general demolition work; can be easily cut to any desired shape and applied with adhesive; meets the requirements of us mil-e-46676 for flexible explosives

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T165-a
