End	Λn	alica	tion:
⊏Hu	Api	ullua	tion:

Crew egress sys maint

General Description:

The detonation signal fm the i/p shielded mild detonating cord line fires percussion primer which ignites pyrotechnic delay column. After pre-determined delay, this initiates explosive booster (lead azide & hexanitrostilbene) which initiates the o/p shielded mild detonating cord line

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
