**End Application:**

F-117 aircraft

**Detonation Initiation Method:**

Gas

**Cartridge:**

Not included

**Dod Ammunition Code:**

1377-ss78

**Special Features:**

Canopy sequencing valve; upper initiator; incoming gas will exhaust through safety vent from initial piston position to .25 min stroke. Safety vent is closed at end of stroke; height 1.340 in; width .800 in

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T190-j
