End Application:

F-117 aircraft

Detonation Initiation Method:

Gas

Cartridge:

Not included

Dod Ammunition Code:

1377-ss78

Special Features:

Canopy sequencing valve; upper initiator; incoming gas will exhaust through safety vent from initial piston position to .25 min stroke. Safety vent is closed at end of stroke; height 1.340 in; width .800 in

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T190-j
