Diameter:

0.191 inches

Length:

5.719 inches

Environmental Protection:

Waterproof

Exterior Covering Material:

Metal

Filler Material:

Hexanitrostilbene, type ii, gr a

Cross-sectional Shape:

Circular

Dod Ammunition Code:

1377-mu67

Dot Identification Number:

Un0367

Dot Registration Code:

Ex1997120214

Special Features:

Used in f/a-18d aircraft emergency canopy jettison system and seat ejection system for detonating wave propagation between various portions of the system such as initiators, explosive manifolds, and provides ballistic signal transmission systems between the seats, pkg as required

Hazardous Material Classification Code:

1.4 department of defense hazard class division

Precious Material:

Silver

Dot Proper Shipping Name:

Fuzes, detonating

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T165-c
