**Diameter:**

0.191 inches

**Length:**

10.854 inches

**Environmental Protection:**

Waterproof

**Exterior Covering Material:**

Metal

**Filler Material:**

Hexanitrostilbene, type ii, gr a

**Cross-sectional Shape:**

Circular

**Dod Ammunition Code:**

1377-mu70

**Dot Identification Number:**

Un0367

**Dot Registration Code:**

Ex1997120217

**Special Features:**

Used in f/a-18d aircraft emergency canopy jettison system and seat ejection system for detonating wave propagation between various portions of the system such as initiators, explosive manifolds, and provides ballistic signal transmission systems between the seats, pkg as required

**Hazardous Material Classification Code:**

1.4 department of defense hazard class division

**Precious Material:**

Silver

**Dot Proper Shipping Name:**

Fuzes, detonating

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T165-c
