End Application:

F/a-18c and ka/f-18c aircraft deployable flight incident recorder (dfir)

Cross-sectional Shape:

Circular

Dod Ammunition Code:

1377-mu73

Special Features:

Cord assemblies are used in the air craft deployable flight incident recorder (dfir) system for detonating wave propagation of the system from the seat, impact initiator, and underwater initiator to the servable door and the front mount

Hazardous Material Classification Code:

1.4 department of defense hazard class division and n/a firefighting group and (00) inhabited building distance and s storage compatibility group

Quantity Per Shipping Container:

15

Supplementary Features:

The detonator cord set contains 15 individual detonating cords

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T165-c
