End Application:

1385-01-456-9129

Special Features:

The water disrupter deployer assembly consists of a mounting adapter, cross bar, adjustable lifting rods, and adjustable lifting forks. The mounting adapter is designed with channels on both sides allowing the finger on the wrist pitch gripper to maintain positive control of the mounting adapter once the gripper closes. The mounting adapter holds the cross bar which allows adjustable lifting rods and forks to travel on. The water disrupter deployer assembly with adjustable lifting rods is used to transport and emplace various charges. The adjustable lifting forks may be used to transport and emplace a variety of lightweight objects.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
