Overall Length:

7.680 inches

Overall Height:

2.000 inches

Overall Width:

3.470 inches

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Mechanical

Circuit Construction Type:

Solid state

External Dc Operating Voltage In Volts:

25.0 single voltage

Fsc Application Data:

Oscillator subassembly, radar frequency master, guided missile remotecontrol system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
