General Description:

Material core inductor ferrite 1; wire, magnet, electrical, cl220, type m round awg 26 approx 20in or ar; wire is aromatic polyimide coated: dielectrical withstanding volts greater than 100 rms; insulation greater than 100 megohms; inductance 38 4h at 1 volt rms

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
