End Application:
1420-01-196-7205
Criticality Code Justification:
Text
Functional Description:
Nondestructive readout magnetic memory storage element
General Description:
Zconsists of a substrate wire in accordance with fms 40269 type ii, class b, grade 2; an inner plating of copper and an outer plating of
nickel-iron alloy; nuclear hardness critical per honeywell document ed22049; length 8.79 in
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
