Ac Voltage Rating:

120.0 volts

Frequency Rating:

60.0 hertz

Internal Battery Accommodation:

Not included

Recording Method:

Sensitized paper

Channel Quantity:

31

Information Recorded:

Missile status recorded

Phase:

Single

Special Features:

Prints any message that can be made from 9 numeric characters and 20 alphabetic characters, prints a of 216 characters per second

Fsc Application Data:

Guided missile remote control system, ground

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T198-a
