End Application:

Aim-9 sidewinder missile for f-5e/f acft

Special Features:

A microprocessor controlled system for controlling aim-9 sidewinder missile; has off-boresight, slave to radar and lcross (lead comp optical sight system), and 2 power supplies; increases the field of view to allow the pilot to acquire targets via radar

General Description:

Econsists of 4 line replaceable units: aircraft-launcher interface computer p/n 26330-501, input/output interface unit p/n 26331-501, signal data converter p/n 26324-501, and power supply p/n 26323-501

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
