Mounting Type:

Pylon

Installation Design:

Removable

Mounting Location:

Both wings

Aircraft Type For Which Designed:

Fixed wing

Missile Launching Method:

Forward travel along side rails

Missile Type For Which Designed:

Agm-65 d/e

Special Features:

Coated with radar absorbing materia (ram)

Supplementary Features:

Used on f-16, f-15, a-10 and f/a-18 aircraft, dwg name is launcher, guided missile, aircraft lau-117 (v)3/a(ram)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A50310
