**Prime Mover Type:**

Electric motor

**Operation Method:**

Power

**Maximum Load Rating:**

150.0 pounds

**Special Features:**

3100.0 in. High x 46.0 in long x 28 in. Wide; belt driven transmission, 4 casters with plastic wheels, 20 ft. Long cord for remote operation of speed and direction, break-clutch, used to lift inertial measurement unit (imu), sphere, and stable member

**Supplementary Features:**

Lgm-118 missile

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A02800
