Prime Mover Type:

Electric motor

Operation Method:

Power

Maximum Load Rating:

150.0 pounds

Special Features:

3100.0 in. High x 46.0 in long x 28 in. Wide; belt driven transmission, 4 casters with plastic wheels, 20 ft. Long cord for remote operation of speed and direction, break-clutch, used to lift inertial measurement unit (imu), sphere, and stable member

Supplementary Features:

Lgm-118 missile

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A02800
