End Application:

Lgm-118a peacekeeper missile

Special Features:

Total assembly weight - 1414 lbs.; hand pump operation: 2 stage, pressure - 10, 000 psig with relief valves of 3400 +/- 100 psig

General Description:

Fwd lift assembly; used for stage leveling during roll transfer and shock mitigation during transportation; consists of manifold, hydraulic tubes and hoses, frame and wheel assembly, 2 hydraulic cylinders, pressure gauge on each cylinder, self contained hydraulic source - hand pump

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
