End Application:

Lgm-118a peacekeeper missile

Product Name:

Ring assembly, rotation

Special Features:

Outer diameter - 107.5 in.; inner diameter - 96.3 in.; weighs 2135 lbs.; maximum pneu oper. Pressure - 50 psig; min pneu oper. Pressure - 30 psig

General Description:

Used to hold and support the stage i or ii srm during dissect rotate and traverse functions and to hold support cut sections during breakover; consists of large diameter fabricated steel ring with 3 pneumatic bladders, pneumatic gage panel, pneumatic valve panel, brackets, 3 pneumatic gages, regulator, manifold, check valves, nylon tubing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
