Overall Length:

34.25 inches

Overall Height:

12.0 inches

Engine Type And Quantity:

4 electric motor

Aircraft Function:

Reconnaissance and surveillance

Take Off Method:

Vertical

Recovery Method:

Conventional

Aircraft Type For Which Designed:

Rotary wing

Operation Method And Control Type:

Remote control remote location pilot

Product Name:

Aircraft and aerial video system

Material:

Carbon

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A547h0
