**Cross Sectional Shape:**

Flat

**Width:**

4.200 inches

**Edge Shape:**

Rectangle, no holes

**Length:**

5.000 inches

**Corner Radius:**

1.000 inches

**Body Thickness:**

0.040 inches

**Securing Device Type:**

Threaded fastener

**Features Provided:**

Sealing capability

**Material:**

Aluminum alloy 7075

**Material Specification:**

Qq-a-250/13, t6 federal specification single material response

**Fsc Application Data:**

Airframe structural component

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A531h0
