Cross Sectional Shape:

Flat

Width:

4.200 inches

Edge Shape:

Rectangle, no holes

Length:

5.000 inches

Corner Radius:

1.000 inches

Body Thickness:

0.040 inches

Securing Device Type:

Threaded fastener

Features Provided:

Sealing capability

Material:

Aluminum alloy 7075

Material Specification:

Qq-a-250/13, t6 federal specification single material response

Fsc Application Data:

Airframe structural component

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A531h0
