Securing Device Type:

Threaded fastener

Mounting Opening Shape Style:

Unthreaded hole

End Application:

F-5 aircraft

Criticality Code Justification:

Feat

Special Features:

This item has been determined to be a critical application item. In-flight failure of this item would create a hazardous condition

Material:

Magnesium alloy az31b

Material Specification:

Qq-m-44, h24 federal specification single material response

Fsc Application Data:

Fuselage section, airframe

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A531h0
