**Securing Device Type:**

Threaded fastener

**Mounting Opening Shape Style:**

Unthreaded hole

**End Application:**

F-5 aircraft

**Criticality Code Justification:**

Feat

**Special Features:**

This item has been determined to be a critical application item. In-flight failure of this item would create a hazardous condition

**Material:**

Magnesium alloy az31b

**Material Specification:**

Qq-m-44, h24 federal specification single material response

**Fsc Application Data:**

Fuselage section, airframe

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A531h0
