**Overall Length:**

48.000 inches

**Overall Height:**

24.000 inches

**Overall Width:**

19.000 inches

**Voltage In Volts And Current Type:**

240.0 ac

**Product Name:**

Blower, hot air

**Special Features:**

Control box - explosion proof, aluminum; contains all starters, timers, miscellaneous electrical components & wiring

**Functional Description:**

3/4 hp, 3-phase thermally protected motor; electrostatic air filter

**Relationship To Similar Equipment:**

Replacement for mmep-12b

**Supplementary Features:**

Heater assembly - 6 finned electric heaters, 2000 watts ea; total available heat 12,000 watts, 40,000 btu's; heat will produce approx. 100 deg. Temperature rise

**General Description:**

Aluminum blower, non-sparking, high pressure, 400 c.F.M. At 4 in. Water gauge

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
