Overall Length:

48.000 inches

Overall Height:

24.000 inches

Overall Width:

19.000 inches

Voltage In Volts And Current Type:

240.0 ac

Product Name:

Blower, hot air

Special Features:

Control box - explosion proof, aluminum; contains all starters, timers, miscellaneous electrical components & wiring

Functional Description:

3/4 hp, 3-phase thermally protected motor; electrostatic air filter

Relationship To Similar Equipment:

Replacement for mmep-12b

Supplementary Features:

Heater assembly - 6 finned electric heaters, 2000 watts ea; total available heat 12,000 watts, 40,000 btu's; heat will produce approx. 100 deg. Temperature rise

General Description:

Aluminum blower, non-sparking, high pressure, 400 c.F.M. At 4 in. Water gauge

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
