End Application:

Mh60

Product Name:

(inavy)stringer installatioon, side fuselage

Aircraft Station Number:

WI261.20 and wI256.70

Aircraft Mission Design Series:

Mh60

Special Features:

J shaped stringer having 89 degree angle on larger side connection and 91 degree angle on shorter side connection; having two through holes located at 5.000 and 15.970 inches from left end; also having two additional through holes located between left end and the 5.000 inch hole; larger side portion has 21 through holes evenly spaced between the bends in the stringer

Material:

Aluminum alloy 7075

Material Specification:

Ams-qq-a-250/13 assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A11400
