Material Thickness:

Between 0.032 inches and 0.065 inches

End Application:

Duct assembly, bleed air

Hole Quantity:

3

Product Name:

Wing pack feed duct assembly

Aircraft Location:

Wingpack

Aircraft Mission Design Series:

Nimrod2000

Special Features:

Insulated using Johns-Manville micro-fiber felt, .25 inches thick, 4 pounds/cubic foot density; compressed to a thickness of .17 inches unless otherwise shown; insulation cover shall be fiberglass cloth (no.164) .019 thick; impregnated with silicone rubber uncured black; also made with nickel chromium alloy; weight is 7.83 pounds when insulated, 7.16 pounds when uninsulated

Height:

12.820 inches

Material:

Nickel alloy 718

Material Specification:

NI0010 mfr ref single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A11800
