**Overall Length:**

3.40 inches

**Overall Width:**

3.08 inches

**Material Thickness:**

0.156 inches

**End Application:**

Hh 60

**Product Name:**

Web, structural component, aircraft

**Aircraft Location:**

BI 34.5 beam

**Aircraft Station Number:**

BI 34.5 beam modification

**Aircraft Mission Design Series:**

Hh 60

**Special Features:**

B.L. 34.5 beam modifications; shim; next assembly 9527-0001; used on mh-60g; opposite pat dash 105

**Material:**

Aluminum alloy 7075

**Material Specification:**

Qq-a-250/12 assn standard single material response

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A11400
