End Application:

Aircraft model a-4

General Description:

Ram air turbine is mounted on the nose section of the store; it is a propeller type ram air driven power source for the hydraulic pump; the turbine has a mechanical feature which governs its speed from 3600 to 5000 rpm; turbine has four symmetrically arranged blade assemblys powering a common shaft; an external spline mates with the hydraulic pump; six threaded turbine studs provide mounting through the nose section casting and hydraulic pump

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23900
