**Special Features:**

19.400 in. Lg one side, 16.600 in. Lg other side by 12.200 in. Wd flange; proof pressure 535 psig at 1064 degrees f bleed air circuit; 90 psig at 1067 degrees f service air circuit; burst pressure 730 psig at 1064 degrees f bleed air circuit, 150 psig at 1067 degrees f service air circuit; operating pressure 155 psig at 1064 degrees f bleed air circuit, 60 psig at 1067 degrees f service air circuit

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T240-c
