Product Name:

Parachute tester, automatic actuator

Special Features:

Determines serviceability of automatic parachute releases; test barometric sensing device within correct altitude settings

Functional Description:

A self contained unit used to simulates an increase in altitude to a predetermined valve above the preset altitude of the actuator. Ambient outside air is bled back at a controlled rate into the test chamber to simulate a rate of decreasing altitude; o/a dim: 16.000 in. W., 14.000 in. H., 12.000 in. D.; wt: 24 lbs

Reference Data And Literature:

33d15-18-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
