**Product Name:** 

Parachute tester, automatic actuator

**Special Features:** 

Determines serviceability of automatic parachute releases; test barometric sensing device within correct altitude settings

**Functional Description:** 

A self contained unit used to simulates an increase in altitude to a predetermined valve above the preset altitude of the actuator. Ambient outside air is bled back at a controlled rate into the test chamber to simulate a rate of decreasing altitude; o/a dim: 16.000 in. W., 14.000 in.

H., 12.000 in. D.; wt: 24 lbs

**Reference Data And Literature:** 

33d15-18-3

Shelf Life:

N/a

**Unit Of Measure:** 

--

**Demilitarization:** 

Yes - demil/mli
